PLAIN SIGHT.

A SYSTEM FOR ORDINARY ATTENTION

01 / INTENT

Make looking the subject.

Identity is a frame, not the subject. The pictures hold the feeling; typography assigns rhythm, context and the space between them.

02 / TYPOGRAPHY — THREE ROLES

Aa

Expressive / display

Large decisions, optical spacing, selective italic.

Attention is a medium.

Quiet / text — information, navigation, captions

01 / 03 IMG — 0045 TYPE — CAPTION

Structure / metadata

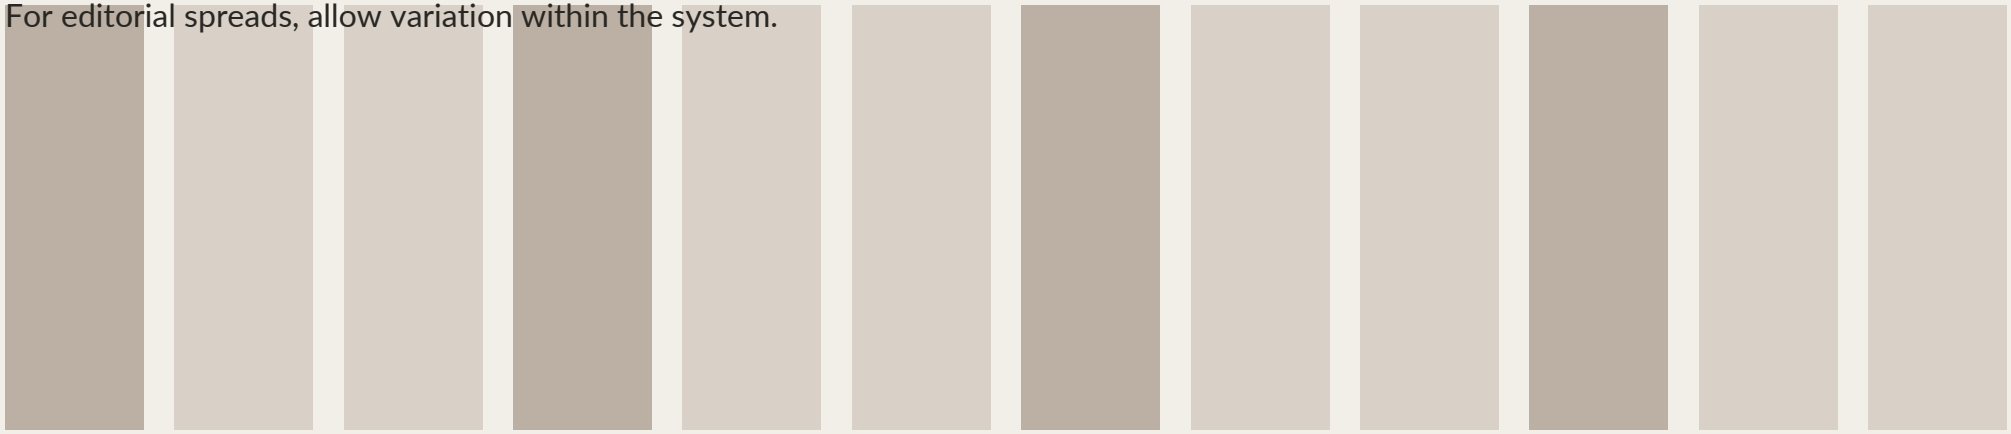

03 / GRID & ALIGNMENT

A rhythm not a template.

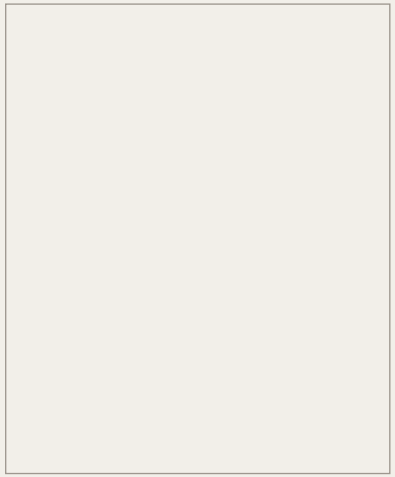

12 equal working columns / 8-point baseline

Gutters vary with medium, alignment stays accountable.

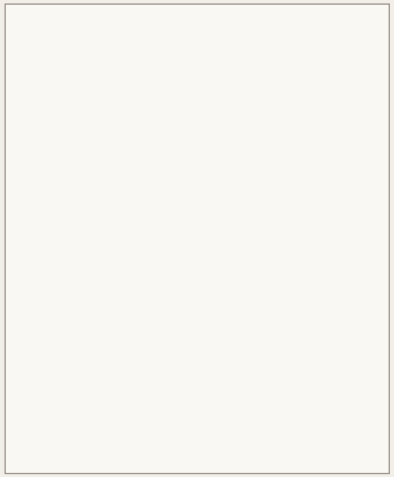

For editorial spreads, allow variation within the system.

04 / COLOR AS ENVIRONMENT

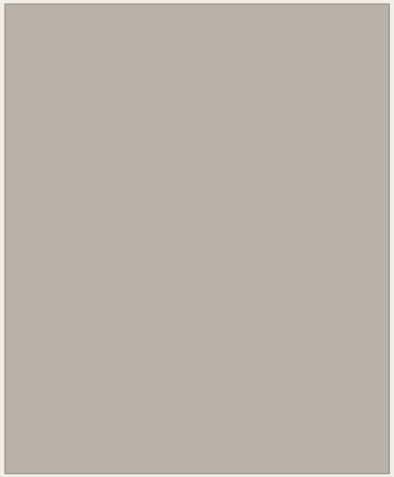

PAPER / F2EFE9

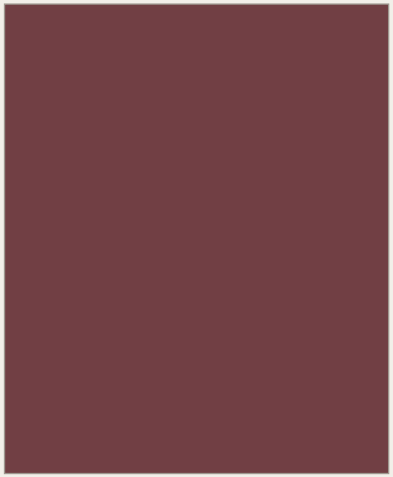

IVORY / FAF8F2

INK / 292724

RULE / B9B2A8

OXBLOOD / 713F44

A foundation that stays quiet while the photography changes.

05 / PHOTOGRAPHIC DIRECTION

01 / GESTURES

02 / ARRANGEMENTS

03 / IN BETWEEN

Five generated master scenes; derivative crops are never represented as separate exposures.

06 / APPLICATIONS

The format changes.
The logic remains.

IMAGE-LED

EDITORIAL CROP

SPATIAL

07 / PRODUCTION & PROVENANCE

Good design *names its limits.*

Digital and print are separate production conditions.

PDFs contain embedded type and image placements but require

vendor preflight for stock, trimming, colors, bleed and printing.

Photography is generated; results and audience claims are not invented.

Responsive site and interaction QA must be tested at deployment.
