

NIGHT SHIFT

A production prototype for a 20-page saddle-stitched culture guide with a foldout map, postcard set, and belly band.

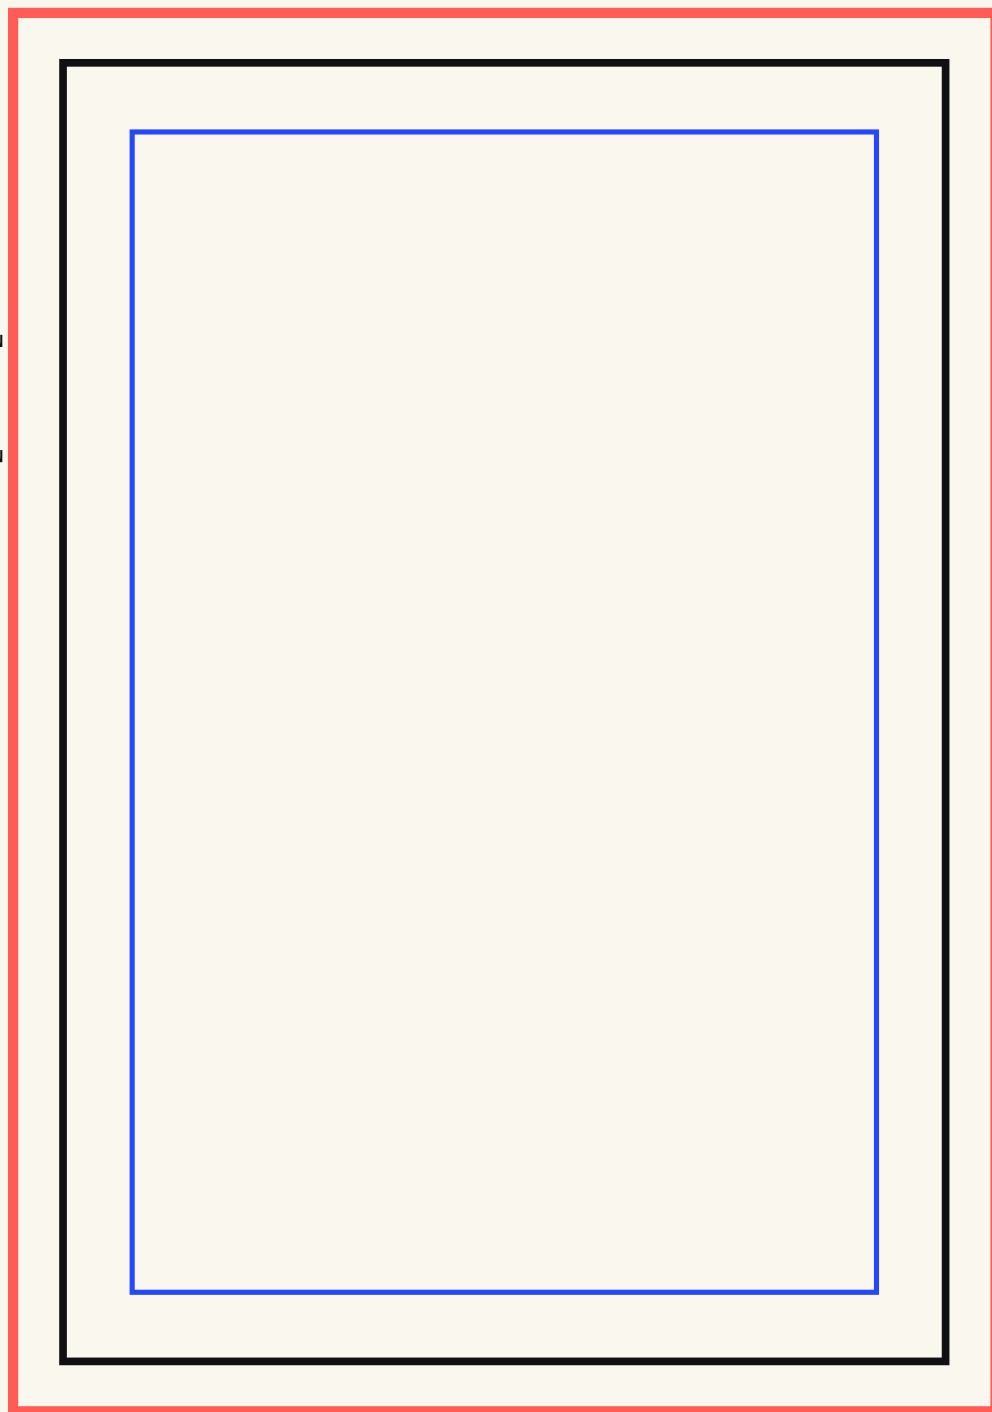

BUILD THE FILE FOR THE CUT.

 BLEED / 0.125 IN

 TRIM / 5.5 x 8.5 IN

 SAFE AREA / 0.25 IN

Background color and imagery extend through bleed. Folios, body copy, logos, and critical labels remain inside the safe area. Crop marks are supplied only when requested by the printer.

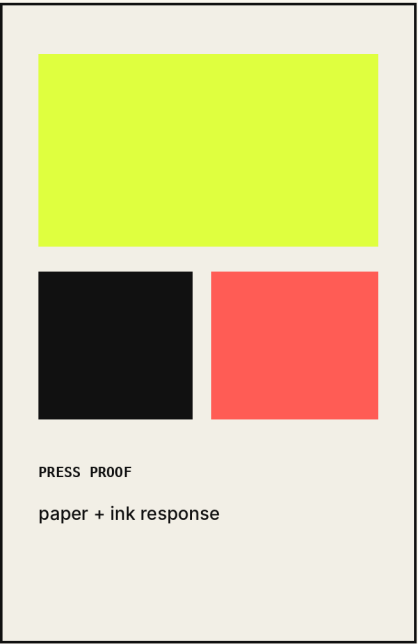

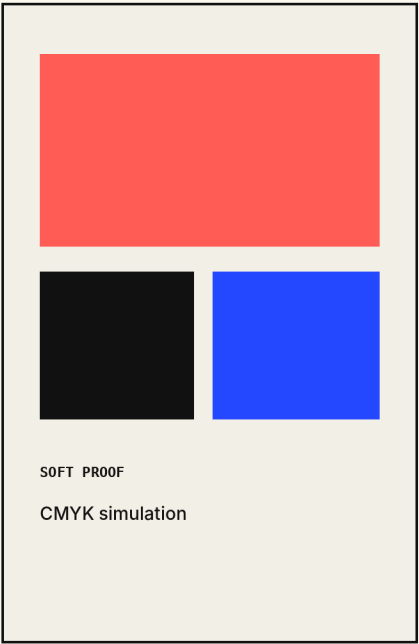

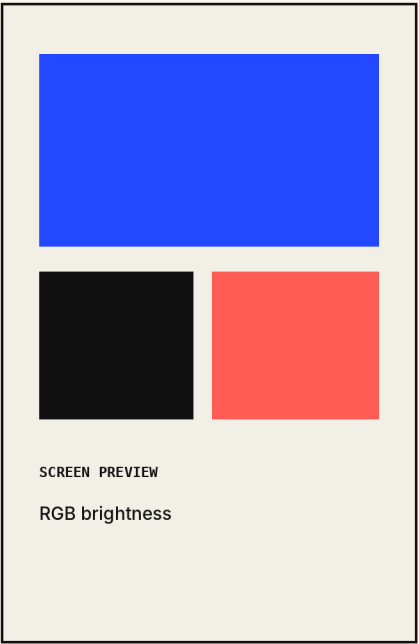

SADDLE STITCH CHANGES THE EDGE.

CREEP CHECK

Nested pages push slightly outward at the fore edge. For a 20-page short-run zine, the shift is modest but still affects narrow borders, page-edge labels, and full-bleed image registration. A folded dummy should be measured before final output.

SCREEN COLOR IS NOT PAPER COLOR.

TEXT 80 lb uncoated low glare / writable	COVER 100 lb uncoated cover body without stiffness
FOLDOUT 70 lb opaque text folds without excessive bulk	POSTCARDS 16 pt uncoated cover durable / mail-friendly

ONE SYSTEM. SEVERAL OBJECTS.

The zine, foldout, postcard set, and belly band share the same typography, signal colors, route icons, and production language. The pieces are related without being identical.

THE LAST TEN PERCENT IS THE JOB.

01 / CONTENT

- ☐ dates / times / venue names
- ☐ page order and folios
- ☐ captions and modeled-data labels
- ☐ URLs and calls to action

02 / DESIGN

- ☐ baseline and grid alignment
- ☐ type hierarchy and contrast
- ☐ consistent image treatment
- ☐ orphan / widow review

03 / PRODUCTION

- ☐ bleed and safe area
- ☐ image resolution and CMYK conversion
- ☐ fold and creep dummy
- ☐ printer preset and final filename

This project is ready for a short-run physical proof. The case-study mockups should be replaced or supplemented with real photographs after printing: cover, staples, fold, trim edge, paper texture, handheld scale, and proof comparison.
