

Thresholds

A cross-format visual communication system for a fictional cultural exhibition — spanning presentation, social, print, and environmental applications.

Prepared by Jocelyn Martinez
UX/UI + Visual Designer

Presentation · social · print · space

A flexible identity across audience-facing formats.

Thresholds explores how one exhibition idea can retain its hierarchy, atmosphere, and recognizability across a narrative deck, campaign assets, printed collateral, and the physical environment.

01

Presentation craft

Hierarchy, pacing, templates, animated-build thinking

02

Multi-format production

LinkedIn, Instagram, one-pagers, signage-style layouts

03

Detail orientation

Proofing, export, alignment, file hygiene, final QA

04

Experience-design interest

Narrative, wayfinding, spatial storytelling, visitor flow

A design system for stories that move from deck → social → print → space.

03

CREATIVE BRIEF

Turn invisible memory into a walkable story.

Thresholds is a fictional immersive exhibition concept about ordinary objects, personal memory, and the traces people leave behind. The deck demonstrates how I would shape a client-facing design direction with clear pacing and visual discipline.

Material mood: translucent acrylic, warm linen, oxidized brass, archival paper.

OBJECTIVE

Build emotional clarity without visual clutter

AUDIENCE	Museum visitors, cultural partners, educators, donors
TONE	Warm, reflective, elevated, intimate
DELIVERABLES	Client deck, social templates, one-pager, signage cues
SUCCESS	The idea is understood quickly and remembered visually

A deck should guide attention like a visitor path.

This slide shows how the idea is paced for a client audience: establish the emotional hook, then move into concept, visitor experience, system assets, and production detail.

Designer signal

Not just pretty slides —
structured story, clear
pacing, and reusable logic.

01

Hook

Why this story matters

02

Concept

The organizing design idea

03

Experience

How visitors move through it

04

System

Deck, social, print, signage

05

Delivery

QA, exports, file handoff

A spatial language built from thresholds, fragments, and glow.

The concept uses translucent layers, warm directional light, and quiet moments of scale to make the exhibition feel immersive without becoming visually crowded.

Orientation

A calm entry moment that tells visitors how to read the space.

Memory rooms

Four thematic zones: object, voice, place, and trace.

Exit reflection

A final prompt that turns viewing into participation.

One system, many applications.

The system is intentionally production-friendly: a small palette, repeatable type hierarchy, strong crop logic, and clear usage rules for fast deck and social variations.

SECTION TITLES / GEORGIA

Thresholds

Client-facing decks need a clear typographic ladder: big idea, context, evidence, label, and production note.

Deck body / Aptos 11–14 pt

Labels / uppercase / tracking +1.6

Captions / concise production notes

Reusable slide layouts for speed and consistency.

This is the kind of system I would build and maintain for a studio team: clear modules, consistent spacing, and simple rules that survive revisions.

PowerPoint animation note: use short fade / wipe builds to reveal sequences, not decorative motion that distracts from the idea.

Cutdowns that keep the idea intact.

Cross-format production requires fast, accurate variations without weakening the core idea. This system uses a flexible crop grid, consistent caption space, and restrained motion cues for carousels and cover frames.

LinkedIn carousel	1600 × 900 / idea sequence
Instagram feed	1080 × 1080 / visual hook
Story / reel cover	1080 × 1920 / vertical crop
Event graphic	date + location + CTA

A one-page leave-behind with print-ready discipline.

This slide demonstrates print thinking: bleed-safe composition, clear hierarchy, cropping rules, caption systems, and production checks before export.

- ✓ Bleeds and trims set
- ✓ Links packaged and named
- ✓ Images 300 DPI+
- ✓ Exported PDF and editable file
- ✓ Final proofread pass

LEAVE-BEHIND

Thresholds

An immersive cultural experience about memory, material traces, and the spaces between stories.

BLEED 0.125" · CMYK READY · 300 DPI IMAGERY

The work is not finished until it is clean enough to hand off.

For this role, quality control is a hiring signal. I would bring a production checklist mindset to decks, submissions, exports, and social variations.

Proofing

names, dates, captions, grammar, labels

Design QA

alignment, spacing, type hierarchy, image crops

Export QA

PPTX, PDF, links, package, resolution, file names

FILE HYGIENE EXAMPLE: 00_ADMIN / 01_SOURCE / 02_LINKED_ASSETS / 03_EXPORTS / 04_FINAL_DELIVERY

A SYSTEM DESIGNED TO TRAVEL

Consistency is not repetition.

Add this as a short “Presentation + Visual System Sample” project. The title can be: “Thresholds — Presentation, Social, and Print System.” In the case-study caption, explain that it is a self-directed design exercise created to demonstrate deck storytelling, production accuracy, and multi-format adaptation.

PROJECT REFLECTION

- Strongest contribution: a reusable presentation and campaign system
- Production focus: decks, social variations, print, and environmental applications
- Next iteration: test motion pacing, proof printed colors, and refine wayfinding at scale
- Project type: self-directed visual communication concept
